

AFCESA

A-GRAM

AIR FORCE CIVIL ENGINEER SUPPORT AGENCY

00-01

JANUARY 2000

SYNOPSIS:

This A-Gram supersedes A-Gram 97-5. The Air Force Civil Engineer Support Agency (AFCESA) Internet Home Page (address: <http://www.afcesa.af.mil/>) has been set up to electronically disseminate information to our customers all over the world. It is continuously updated and improved.

PAGE ARRANGEMENT:

This site has been kept simple to make retrieval of data fast and easy. Our home page was designed for quick reference to a variety of programs. The links are set up so that those down the left side are for retrieval of information as it is separated into three areas: About AFCESA, Products and Services, and Directorates. We have also added a section to highlight some of the many programs the agency is working. CE Hot Topics are links to current information on topics that are of high interest to the CE community, such as the upcoming Readiness Challenge VII competition. For easy navigation we have included a sitemap, a table of contents linking to different programs, and a search page link.

ABOUT AFCESA:

Under this section, browsers will find links to About AFCESA, Phone listings, and the Library. About AFCESA includes the mission statement and pertinent facts

AFCESA HOME PAGE

including History, Facts Sheets and Biographies. The Library page contains links to applicable AFCESA A-grams for 1995, 1996, 1997, 1998 and 1999; draft publications; current and past issues of *The CE* magazine; and many Engineering Technical Letters.

PRODUCT INFORMATION:

This area contains information specific to one of the six AFCESA product areas: Readiness, Training, Vehicles/Equipment, Management Practices, Automation Support, and Technical Support. Two of these, Training and Vehicles/Equipment, cross-reference information found in pertinent A-Grams. Readiness contains information on Explosive Ordnance Disposal, Fire Protection, and Readiness. Management Practices provides access to documentation for Manpower/Personnel, Financial, Logistics, and Vehicles/ Equipment Management. It also includes Civil Engineering AF Manpower Standards for all flights. Automation Support contains information pertinent to automation and networks, such as Civil

Engineer Automation Steering Group Minutes, ACES, and Listing of Integrated Process Team Members. Technical Support provides technical information in many engineering disciplines, such as pavements, cost engineering, energy, utilities, water and waste-water, and POL distribution systems.

DIRECTORATES:

This section is similar to the Product Information area except that the subject matter is divided into organizational directorates.
